Project Name	Flight finder-navigating your air travel options
Maximum Marks	

Project Overview:

Project Name: FlightFinder – Navigating Your Air Travel Options

Project Description: FlightFinder is a user-centric web application that enables travelers to search, compare, and book flights efficiently. It offers filtering, price comparison, and personalized recommendations.

Project Version: 1.0

Testing Period: 2025-06-22 to 2025-06-25.

Testing Scope:

Features and Functionalities to be Tested:
- Flight search functionality
- Filter and sort results
- Booking process and confirmation

User Stories or Requirements to be Tested:
- As a user, I can search for flights by destination and date
- As a user, I can view and compare flight options
- As a user, I can book a flight and receive a confirmation

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail	Remarks
TC-001	Search for flights	Enter origin, destination, and date Click Search	Relevant flights are displayed	Relevant flights are displayed	Pass	
TC-002	Apply filters	Click on price filter Sort by duration	Flight list updates accordingly	Filter works as expected	Pass	
TC-003	Complete booking	Select flight Enter details Click Book	Booking confirmed and confirmation displayed	Booking successful	Pass	

Bug Tracking:

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Search results load slowly	Search for flights using multiple filters	Medium	In Progress	Optimize backend calls

Sign-off:

Signature: G.Abhishek

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.

Obtain sign-off from both the project manager and product owner before proceeding with deployment
